

PRO48K TechTool Solenoid Test Kit Includes Probe and Carry Case

Application:

The Pro48K TechTool Kit is a complete portable, low cost, battery operated irrigation system diagnostic kit. The Pro48K combines several testers into one, creating a powerful tool that any technician can afford. The Pro48 TechTool incorporates a solenoid activator to hold valves open; a chatterer to locate lost valves; a continuity checker to identify cut or shorted wires or solenoids; and a 24 VAC detector to ensure proper clock power output. Together with the Pro210 Probe, the Pro48 can transmit a tracing tone and identify wires using traditional tone/probe methods. Operation is simple as LEDs indicate tests and conditions. Both units are kept in the included Pro21 carrying case. Truly a workhorse product for any landscape professional.

Features:

- Activate solenoids
- Verify 24VAC power
- Detect short/open wires
- Chatter solenoid coils
- Check solenoid continuity
- ID wire with tone/probe (PRO210)

PRO48 TechTool

- Requires 2 x 9V alkaline batteries
- Battery life – 3 hours continuous
- Voltage output – 36VDC peak
- Voltage protection – 28 VAC

PRO210 Probe

- Requires 1 x 9 V alkaline battery
- Powerful speaker
- One button operation
- Adjustable volume control
- Headset connection
