

Underhill Deep Drip Tree Watering Stakes

Application:

Water and fertilize your trees at the roots, encouraging deeper roots and healthier trees with DeepDrip™ stakes. Water gets underground fast, so you can irrigate for shorter periods and save water. They also help aerate the soil, and you can add fertilizer into the shaft to direct nutrients to the root zone.

Use the 14" (35cm) stake for shallow root trees and shrubs, like rose bushes and ornamental trees (or boxed trees). The 24"(60cm) stake is best for most other tree varieties except for palms and similarly deeper rooted trees, which will benefit from the longer 36" (90cm) stakes.

The reinforced tip, cap, and stakes are made from durable ABS plastic for longer life and operation. Multiple holes in the bottom half of the spike, internally covered by a mesh filter, allow water to flow out but keep dirt from getting in and clogging the tube. The UV-protected cap acts as a reinforced cover when pounding the stake into the ground, keeps debris from entering the shaft and holds a 4mm drip line/emitter securely in place. By inserting a screwdriver through the two holes at the top of the upper shaft, stakes can be easily pulled up to remove/reposition, or rotated to deter root invasion.

Features and Benefits:

- Reduce surface water run off / erosion
- Reduce surface evaporation
- Reach "feeder-roots" faster for more effective watering
- Reduce weeds common to overhead irrigation
- Reduce watering time

MODELS	CODE
350mm Deep Drip Watering Stake	ADD14
600mm Deep Drip Watering Stake	ADD24
900mm Deep Drip Watering Stake	ADD36
Deep Drip Merchandiser Stand – holds 25 of each size	ADDPOP
