

PRODUCT SPECIFICATION

Solenoid Valve Locator

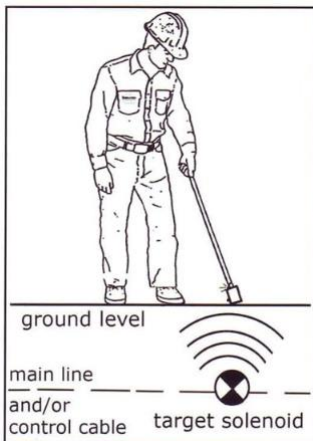

Application:

The Solenoid Seeker helps you find **operating solenoid valves** in garden beds, mulch and turf areas, whether they are directly buried or in a valve box, the SS2002 will find them.

A must for all irrigation maintenance contractors; save time and money by finding your solenoids fast.

Features:

- Simple to use
- One person operation
- Low cost
- Locate active coils up to 500mm in depth
- Indicator LED and buzzer
- Compact design
- One year warranty

HOW DO I OPERATE THE SS2002?

Set-Up

1. Attach a piece of 20mm PVC pipe to the piece of conduit attached to the end of the Solenoid Seeker, length of pipe will depend on personal preference.
2. Apply power to the solenoid you wish to locate.

Operation

1. Switch power switch to on, Red LED will illuminate.
2. Wait 30 seconds
3. Sweep the Solenoid Seeker across the ground slowly in the general vicinity of the solenoid, with the sensitivity on full. Keep the Solenoid Seeker as close to the ground as it has a range of approximately 500mm on full.
4. When the SS2002 locates the solenoid, the Indicator LED will illuminate and the buzzer will sound.
5. Reduce the sensitivity now; this will enable you to locate the solenoid in a smaller surface area, making it easier to find its exact location.
