

PRODUCT SPECIFICATION

Adjustable PISTOLS

This nozzle is fully adjustable from a light spray for watering plants to a powerful jet spray for cleaning debris from sidewalks and driveways. To modify water pressure, a rear trigger flow control allows a quick adjustment to the flow of water without going back to the faucet. An innovative, ratcheting lock-on clip on the front/rear trigger holds it in place, allowing continuous water flow which helps reduce hand fatigue.

- Stream adjusts from a light spray to a powerful jet
- Handle controls shut off
- Lock on clip for continuous water flow
- For outdoor use with cold water only
