HR USB

POWER PACK

With Wi-Fi enabled controllers now becoming more common in domestic and commercial irrigation installations, rather than having a separate power supply mounted at the controller taking up another power outlet, the HR USB power pack will give you a USB plug that users will be able to connect their own USB modem/SIM card and power up.

Simply connect the two yellow wires from the HRUSBPP to the power terminal on your existing controller and connect your USB modem (modem must be capable of allowing other devices to pair) then connect your controller via their own software to the Wi-Fi signal.

The HRUSBPP is multi voltage so you can use on either AC (7-35V) or DC (8-52V) and the output of USB connector rated to 5V DC 3amp.

Input cable length is 600mm to allow for the unit to be mounted outside of the controller box to improve signal reception (if required) or can be cut to length.

Measuring a small 4.5cm x 3.0cm x 1.8cm with mounting screw location at 5.5cm centres, the unit will be suitable to fit into the smallest of areas.

MODELS	CODE
HR Universal USB Power Pack	HRUSBPP

Note: For use in cold water irrigation systems only, for all other applications please consult HR Products Images are a guide only and may not represent final product
