

HR USB POWER PACK & TELSTRA 4G WIFI MODEM

The HRUSBWIFI controller modem provides users with a Wi-Fi network allowing installed Smart controllers remote access via the Telstra 4G network. Power for the modem is provided by the usb power pack which is connected to the controllers 24vac ports.

Please consult HR Products if you are unsure which 24vac ports to connect.

Activation of Telstra 4GX modem is completed by using the Getting Started Guide included in the pack along with the Terms and Conditions. 3GB of data is provided for use within 30 days of activation - after 30 days of activation the user is responsible for their own Data account.

The HRUSBPP is multi voltage the input can be either AC (7-35V) or DC (8-52V) with the output of USB connector rated to 5V DC 3amp.

Input cable length is 600mm to allow for the unit to be mounted outside of the controller box to improve signal reception (if required) or can be cut to length .

Measurements:

HRUSBPP 45mm x 30mm x 18mm

4GX WIFI MODEM 95mm x 30mm x 13mm
