

GREENWELL - TREE SURROUNDS

Greenwell Ensures Deep Root Watering

Because of its permanent bowl integrity, and therefore its ability to eliminate water runoff, Greenwell is a proven product to ensure deep root watering during tree watering events.

Genuine water savings

The Greenwell Water Saver is very commonly used in local councils and by home gardeners throughout Australia. Why? To save money on the costs of watering, and to reduce the loss of trees due to heat stress.

Simple, Quick, Cheap & Deep Watering

Watering plants is important, but how can you get the water to where it matters most? The Greenwell Water Saver delivers applied water directly and quickly to the tree rootball (avoiding water run off).

Saves watering time

Councils and home gardeners love our water savers, they simply fill the well with water and leave. For council watering trucks this takes only a few seconds saving valuable time and costs in watering trees.

Stops the scatter of mulch and fertiliser

Don't you hate it when birds throw all of your mulch out of your garden beds? We help to contain the mulch and fertiliser to ensure that it stays where you put it.

PRODUCT SPECIFICATION

GREENWELLS

GREENWELL - TREE SURROUNDS

Concentrates water, mulch & fertiliser where needed

Not only does the Greenwell contain water, it also contains mulch and fertiliser as well making it simple to keep a tree adequately watered and fed throughout the year.

Easily installed and repositioned

It takes just a few minutes to setup your Greenwell Water saver. Because of its special zip join it can be easily placed around or taken off a tree.

Guards against damage caused by Whipper Snippers

The Greenwell Water Savers also help to ensure that whipper snippers and brush cutters are kept away from the tree trunk. This not only helps ensure the health of the plant, but it also helps to make sure that fertiliser and mulch remains in place.

Eliminates water run-off

This is great for flat or sloping ground, non-wetting soils, etc. In almost all gardens, situations are common where water tends to run away from a plant base. Greenwell completely solves this problem and therefore makes watering very much easier.

Greatly reduces the wastage of our water reserves

We provide you with an extremely efficient, but very simple method of watering your plants in a manner which is friendly to the environment; whilst promoting healthier plants. We contain the water to the areas that need it saving you water and benefiting your plants at the same time.

Keeps lawn or grass away from the tree trunk

Therefore is great for lawns. Is very tidy in appearance. Local Councils comment on its neat, professional appearance.

BLACK

GREEN

TERRACOTTA

Top Diameter 430mm
Bottom Diameter 495mm
Height 190mm
