

PLASTIC AIR RELEASE VALVE

Air Vacuum Relief Valves provide vital protection to pipeline systems. They allow air to escape during system startup by preventing air restrictions, water hammer caused by large air masses, inaccurate flow meter readings and explosive conditions from air being compressed by water.

FEATURES

- Dual acting Air Vacuum Relief Valve
- Body made of glass filled nylon with rubber seat and polystyrene float
- Innovative and slam resistant design allows only water to close valve
- Working Pressure: 1034 kPa
- Durable, weather resistant and non-corrosive material
- Continuous operation
- Protects irrigation system and components
- Easy to install
- Used in Agricultural, Nursery and Landscape applications
